Getting links to the Telegram sticker pack allows you to get the link of a single sticker or the entire package. If this is not the case or you are not sure, you can download the free File Manager application from your Google Play Store.Open file management and go to telegram -&gt; the Telegram folder Documents.In this folder you can find a file consisting of numbers only and in zip format. If you are using File Manager to extract the file, press and hold, then select the More key in the lower-right corner and finally Check out in . . . Click ADD and confirm the operation from the pop-up window that appears. Become. Now all you have to do is start whatsapp and start using your new sticker pack. Some Stickers estimates added after this procedure can also be sent to friends who own an iPhone. Those who receive stickers can add them to favorites. Unlike the stickers built into WhatsApp, custom stickers do not allow you to add the entire package, but only the single sticker that has been sent. For this reason, if you want to share the entire package that has been created, you will need to send each sticker separately. The person who will receive the stickers should worry about manually adding one to each individual item.
